Renato Acosta

Global Technical Services Engineer  
Medtronic

Renato Acosta has been working at Medtronic within the Patient Monitoring OU for less than a year and supports the INVOS, Nellcor, and WT product lines including OEM solutions. After graduating as a mechanical engineer from the University of Texas at El Paso, Renato joined Stoneridge Electronics as a Mechanical Design Engineer for two years supporting electronic components and systems for the automotive/heavy-duty/agricultural markets. He later joined Eastman Chemical Company for nine years to support raw materials for the acetate fibers and medical specialty plastics industries where he held various roles within the company including technical service support.
